Training and strategy

Your board and leadership team spend one morning with us. They cover the key AI and cyber risks and opportunities, what the EU Artificial Intelligence Act (AI Act), the Network and Information Security Directive 2 (NIS2) and the Digital Operational Resilience Act (DORA) ask of them, and finish with a risk workshop on your own organisation.

We then assess where you stand and where AI and security should take the business, and hand you a costed 12-month roadmap and a board paper. Staff training follows, matched to each role and recorded.

WHAT IT COVERS

Executive training

Risks, opportunities and board duties, with a risk workshop, in one half day.

AI and cyber strategy

A costed 12-month roadmap, use cases ranked by value and risk.

Staff training

Role-based sessions with records, meeting the AI literacy duty.

HOW IT WORKS

01 Executive training — ONE HALF DAY
Risks, opportunities, duties, and a risk workshop on your organisation.

02 Strategy and roadmap — 6 TO 10 DAYS
Where you are, what applies, and where AI and security should take you.

03 Staff training — BY ROLE
Half-day sessions by role, built around your own tools and policies.

04 Keep it current — QUARTERLY
Four sessions a year for new joiners and refreshers.

WHY IT MATTERS NOW

The AI Act's AI literacy duty already applies to every organisation that uses AI, and role-based training with records meets it. High-risk AI duties follow from 2 December 2027, and Irish credit unions come under DORA on 17 January 2028. Each puts responsibility on the board.

WHO IT IS FOR
Chairs, chief executives, finance directors and leadership teams

FORMAT
In person or online, built around your own tools and policies
